Abstract

“Educationists should build the capacities of the spirit of inquiry, creativity, entrepreneurial and moral leadership among students and become their role model” – A P J Abdul Kalam.

Youth are dynamic, enthusiastic, innovative and vibrant in nature. Youth show strong passion, motivation and will power which also make them the most valuable human resource for fostering economic, cultural and political development of a nation. A country's ability and potential for growth is determined by the size of its youth population. Their role in building defense capability of a nation is unquestionably primo. The energy and passion of the youth if utilized properly, can bring huge positive change to the society and progress to the nation. Youth are the creative digital innovators in their communities and participate as active citizens, eager to positively contribute to sustainable development. This prime section of the population need to be harnessed, motivated, skilled and streamlined properly to bring rapid progress for a country.

The major issues concerning youth are as follows:

1. Education
2. Employment
3. Civic engagement
4. Migration

This paper concentrates on the Educational psychology of the student trainees pursuing their B.Ed in a reputed aided educational college (co-education).

There is a significant gap between the trainee teachers and the current scenario of our India. It is evident that there is a lack of connectivity between the resource materials like pen, black board, books and its application in contemporary context through assignments, seminars, and demo classes and so on. Yes, it is vital to be skilled and trained to hone the personality of trainee teachers to interact with students, but it is not vivid about the take away of the majority of trainee teachers from their institution.

Because, it is not only about education, choosing a career and withstanding the profession as their passion emulates job satisfaction. Monotonous atmosphere will ultimately become a challenge while refreshing with a decade or more experience in the teaching profession especially to youth.

Key Words : Youth, Vibrant, active citizens, education, trainee teachers, profession, passion.

1. Introduction

Educationists should build the capacities of the spirit of inquiry, creativity, entrepreneurial and moral leadership among students and become their role model” – A P J Abdul Kalam.

Youth are dynamic, enthusiastic, innovative and vibrant in nature. Youth show strong passion, motivation and will power which also make them the most valuable human resource for fostering economic, cultural and political development of a nation. A country's ability and potential for growth is determined by the size of its youth population. Their role in building defense capability of a nation is unquestionably primo. The energy and passion of the youth if utilized properly, can bring huge positive change to the society and progress to the nation. Youth are the creative digital innovators in their communities and participate as active citizens, eager to positively contribute to sustainable development. This prime section of the population need to be harnessed, motivated, skilled and streamlined properly to bring rapid progress for a country.

2. Material and Methods

2.a.Education

The young energetic pupils of collegiate education adapt to simultaneous roles of both learners and trainee teachers. There are numerous adjustments they go through their professional agenda. The trainee teachers go through different dimensions of handling their stability in terms of family, health and social. Their emotions play a vital role in accessing their available resources and opportunities. Their skill depend on handling this precarious nature of concentrating and grasping the concepts according to their abilities and capacities.

2.b.IASE

The Institute of Advanced Study of Education has been taken as a model to study the youth and education behavior among pupils. This collegiate of education has only male population and are tuned towards arising as a teaching community. The author made a visit to IASE, Saidapet and interviewed students to understand their study habits and adjustments made on the pivotal aspects of life.

2.c.Study Habits

Consistent study habit in their life always focused them to achieve their daily schedule.They are able to discern about the concept of reading and studying. Reading initiates glancing and vocabulary building whereas studyingneeds more devotion, time and energy for imbibing concepts and to deliver or disseminate the same in an efficient and effective way. It has been noted to follow a timetable and the readiness to learn is essential for trainee teachers. Budgeting time is a tool for regular reading, studying and writing work that involves classwork and homework with concentration.

The qualitative study has given an idea of the futuristic goal of trainee teachers. The frame of mind and the equilibrium of mental health of pupil would encourage them to study for longer time. And they develop automatic interest in the subject as soon as they start studying. As well they realize the importance of subjects for future career. It is very natural to get engrossed with stray thoughts. Youth webbed thoughts is usually called a period of “storm and stress”. It is a task oriented phase of overcoming stray thoughts and striking a balance between reaching the aim and personal problems.

2.d.Product of Aspiration and Inspiration

Students are also interested in the terminology used to explain every concept that is relevant to our Indian society. They are basically inspired by their teachers and Professors who handle the subjects. They are fascinated by the fact that they are accepted and respected for their persona. Education is a global concept and has an impact on overall development. These students rely on notes and textbooks for to appear in examinations.

2.e.Men in Teaching

With the advent of technology in today’s scenario, the students or the trainee teachers face numerous challenges in procuring knowledge and they are able to sense so many hurdles that they come across in their daily routine. Since, this paper goggles the study habits and adjustments pertaining to only male population, it is necessary to understand their working pattern for productive living. The modern job often requires some form of good education and social skills, particularly sensitivity. This doesn’t fit in with the working class boy’s mentality of masculine jobs; and having restricted speech would impede their social

skills. Men's roles in society are changing as well. Where once there was a time a man would go out and work hard to bring home his family the money, it is now fairly common for the man to abandon his family and this subsequently leaves any male children in these families without a male role model and thus jeopardises the normal working class masculine identities. The normal status of our society always relies on patriarchal decisions. It would be wise to note and observe the systematic working of men. Predominantly, men are result oriented. They are not patient in waiting, but they venture into multiple alternatives to taste the result of their working. Men in IASE are focused to establish and build a flourishing teaching community of their ages. It is also worthy that they consider it a must to attend classes regularly and make optimum use of the library. They strongly believe that books are good friends.

2.f.Communication and Dissemination of knowledge

Communication is a life skill, without which none can survive. Lot of introspection and self-talk often paves way for realization and recognition of their profession. The men population, in general, may not suit to the noble profession but it is disproved to an extent when they pursue their education in IASE.

2.g.Technology as an auxiliary hand

On the other hand, the social networking plays havoc in bringing about a normal and smooth living amongst the trainee teachers. Even though it is flooded with too many data and information; there is always a way for deviation. The consumption of mental energy and time is unknown and many a times unworthy. It is a tough task to keep focusing and retrieve the information needed at appropriate interval of time. Ultimately, it is absolutely acceptable to be not to be away from technology.

3. Results

It is a descriptive qualitative study that shows the study habits and behavior pattern of trainee teachers in IASE. The results to be notified pertaining to the male population are as follows:

- Studying is recommended every day.
- Completing homework daily is advisable.
- Developing automatic interest while studying the subject is necessary.
- It is vital to realize the importance of subjects for their future career.
- Combating the stray thoughts while studying is challenging.
- Trying to recall after studying is inevitable.

- Adjusting to the speed of reading when there is difficulty related to understanding subject matters.
- Visiting and studying in library is essential.
- Developing life skills such as communication, assertiveness and relationship building is obvious.
- Conscious efforts and readiness to learn are important than conducive atmosphere/environment for studying.
- At times, learning by-heart part by part is recommended to have thorough knowledge on theories.
- Taking down notes during classroom lecture is equally important.
- Notes are very useful to recap and recall the concepts before appearing for examinations.
- Even though, when adequate sleep is advised, during examination it is inadequate.
- Preparing to answer the questions during examination is in an order in accordance to the time frame.

4. Discussion

The qualitative study, clearly prescribes the level of study habit of the pupil, pursuing their B.Ed in IASE, Saidapet. It is a continuum. The motivation level towards concentrating in class, taking notes, preparing for examinations, handling stray thoughts, visiting library and so on has a direct relation with their skills and abilities to aspire and join the teaching community.

5. Conclusion

The trainee teachers, especially the male population could communicate and shape themselves very well adhering to their professional values. Despite, the gender differences they are capable of contributing to the knowledge society by educating themselves and serve the society in a holistic manner. Education is the essence of proper thinking and behavior.
